

[Green Power Investment Corporation](#) ("GPI") is a renewable energy developer, owner and operator and has a vacant full time position for a Financial Analyst working in its Tokyo office.

Based in Tokyo, GPI is dedicated to producing clean solar and wind power facilities for a changing world. GPI benefits from a strategic partnership with [Pattern Energy Group LP](#) ("Pattern Development"), which is based in San Francisco, California. GPI has a substantial pipeline of projects across Japan totaling over 1.5 gigawatts.

This position is responsible for financial analysis, due diligence support and modeling. Work duties, include research, data analysis, valuation and risk assessment across a broad range of energy finance and M&A transactions, primarily in wind, solar and transmission.

Suitable candidates will have a Bachelor's degree in Finance, Mathematics, Engineering, Economics or related area combined with at least 2 years of project finance analytical/modelling experience within a bulge bracket firm, an infrastructure lender, or in an investment banking, equity, fixed income or asset management platform. Advanced degree MBA and/or CFA certification is preferred.

This role would ideally suit someone in their early 30s wanting to build a career in renewable energy industry. Compensation is commensurate with experience and qualifications.
